

HESAM (RYAN) ABDOLLAHI

Senior Vessel Planner · Ship Planning, Stowage & Alliance Coordination

Ipswich, United Kingdom

+44 7729 133329

Hesam.abdollahii92@gmail.com

SEAGOING DECK-OFFICER BACKGROUND · MULTILINGUAL · SKILLED WORKER VISA HOLDER

PROFESSIONAL PROFILE

Senior vessel planner with a seagoing deck-officer background, equally at home with what a service needs commercially and what the ship can safely execute. Reads every plan from the vessel's side first, how it lands on the master, the chief officer, the terminal and the live operation, and checks the full picture, intake, allocation, stability and stress, DG and special cargo, before committing rather than only chasing space.

Calm and decisive under planning pressure, spotting problems early and keeping the figures and the communication clear before small issues turn into expensive ones. Multilingual and confident working with masters, chief officers, port captains, terminals, agents, commercial teams and partner lines, and ready to step up from vessel planning into wider ship planning, service coordination and alliance operations across Europe and head-office teams.

CORE COMPETENCIES

Allocation & Intake

Per-port allocation from provisional bookings; max intake, TEU/MT, 20ft/40ft mix, stack weights, partner-line coordination

Stability & Stress

GM/GOM, trim vs consumption, shear force, torsion, free-surface effect, lashing and tier limits

Restow & Service Flow

Restow exposure, COD requests, multi-POD calls, phase-in/phase-out and late commercial amendments

Leadership & Reporting

Workflow coordination across services, software-vs-reality checks, operational reporting and escalation

Stowage & ULCV

Bay/tier planning, load and discharge sequencing, pre- and mid-stow adjustment across ULCV and varied vessel sizes

Special Cargo

DG/IMDG, OOG/BBK, reefers, ISO tanks, heavy and high-value units; segregation and access control

Bunker & Safety

Bunker-party oversight, LNG monitoring, DG/RF clearance of safety zones, restricted-port limits

Stakeholder Coordination

Masters, chief officers, port captains, terminals, agents, commercial and trade teams worldwide

LEADERSHIP & SERVICE COORDINATION

- Support daily planning workflow across multiple vessel services, ensuring allocation figures, stowage updates, terminal instructions and late operational changes are reviewed and issued on time.
- Act as a key link between liners, terminals, port captains, vessels, agents and commercial teams, turning operational constraints into clear planning actions.
- Monitor planning risks affecting schedule reliability, berth productivity, restow cost, safety compliance and commercial intake, escalating issues early with practical solutions.

PROFESSIONAL EXPERIENCE

Senior Vessel Planner · MSC (Mediterranean Shipping Company), United Kingdom

2023 to Present

- Build, review and adjust container vessel stowage plans for international liner services, balancing vessel safety, commercial priority, terminal execution and schedule reliability.
- Set precise per-port allocation from provisional bookings through a self-built, formula-driven Excel system, issued on time to local agents and terminals to stage cargo at the yard, and now adopted as the standard intake and allocation reference across the North America services.
- Review intake, TEU/MT utilisation, 20ft/40ft mix, stack weights and bay/tier restrictions before committing each plan.
- Plan DG/IMDG, OOG and breakbulk, heavy 20s, reefers, ISO tanks and empties to full segregation, access and safety requirements.
- Apply stability and stress judgement across GM/GOM, trim against consumption, shear force, torsion, free-surface effect and lashing limits, advising masters on the required adjustments and seeing them through.

- Make measured pre- and mid-stow adjustments with the terminal to cut yard shifting and operational cost.
- Optimise capacity at restricted ports without surrendering space or deadweight, maximising loading while protecting operational safety and commercial intake.
- Manage restows, COD requests, multi-POD calls, partner-allocation issues and phase-in/phase-out constraints on complex long-haul services spanning the Middle East, Indian Subcontinent, Colombo, North America and Mexico.
- Oversee bunker-party operations with active monitoring, notably on LNG vessels, keeping the safety zone clear of DG and reefer units.
- Guide colleagues on intake checks, port restrictions, vessel definitions, cargo segregation and restow exposure.
- Flag ambiguous data, port-code and vessel-definition errors before they reach operations, and present complex data sets clearly to senior operational audiences.

Relocation to the UK & Postgraduate Study · University of Reading, UK & American College of Greece **2019 to 2023**

- Relocated to the United Kingdom and completed a dual-award MSc in International Shipping & Finance (180 credits), deepening the commercial and financial side of liner shipping alongside seagoing experience.

Senior Navigation Officer & Training Officer · Islamic Republic of Iran Shipping Lines (IRISL) **2015 to 2018**

- Served at sea in a senior deck capacity, building first-hand command of vessel operations, bridge resource management, cargo operations and shipboard safety culture.
- Ran navigational watchkeeping, passage planning, berthing/unberthing support and voyage records to international maritime standards.
- Worked alongside the master and senior officers through port calls, inspections and drills, informing the vessel-side judgement now applied shore-side.
- Led safety and emergency drills and trained multinational deck cadets, lifting onboard readiness and discipline.

Earlier shore-based roles · Iran, 2016 to 2019

- **Project Assistant & Financial Analyst**, Ariyanpoor Holding (2018 to 2019): milestone tracking, stakeholder coordination and operational/financial reporting; coordinated a team of 10.
- **Customs Coordinator**, Bushehr Customs Authority (2017 to 2018): import/export documentation, clearance and inspection coordination; depot and HGV gate-control liaison.
- **Logistics Coordinator**, Arad Freight Forwarding & Logistics (2016 to 2017): road and sea shipment coordination, carrier assignment and delivery tracking; subcontractor negotiation on cost and reliability.

EDUCATION

MSc International Shipping & Finance, Dual Award, 180 Credits · University of Reading (UK) & American College of Greece **2019 to 2023**

BSc Maritime Navigation Engineering, Full Academic Scholarship (IRISL) · Azad University of Kharg, Iran

TESOL Certificate · Vancouver International College, Canada

MARITIME CERTIFICATIONS

GMDSS/GOC · ECDIS · Radar/ARPA · Advanced Firefighting · Survival Craft & Rescue Boat · Medical First Aid · ISPS / Port Security · Seafarer Security Duties

SYSTEMS, TOOLS & LANGUAGES

TOOLS Advanced Excel (formula-driven automation) · Word · PowerPoint · QlikView · SQL (basic) · Adobe Photoshop · Planned Maintenance & Stores/Spares Control Systems

LANGUAGES English (professional working) · Persian/Farsi (native) · Turkish (conversational) · Italian & Arabic (reading/listening) · Mandarin (currently learning)

AWARDS & ADDITIONAL

University of Reading RED Award · Istanbul Regional Teaching Award · World Animal Protection Honor Badge · Iran National Physics Olympiad (country level) · Certified Personal Trainer (NASM L2 & L3)
